

THE TREASURY  
OF KALOCSA

This publication gives you an introduction to the ecclesiastical art material from the collection of the Archdiocese of Kalocsa, which due to its richness, earned the right to be called a 'Treasury'. With the help of this, one can see how the endeavors, dreams, and the most sacred sentiments of a millennium materialized when put in front of the Creator, still lifting the hearts and souls of the gracious spectators, who are open to such beauty, towards Him.

Through this book we can meet with the different collections and their most important, most characteristic pieces. We can get an insight into the sometimes adventurous story behind some of the show-pieces, while meticulous descriptions draw attention to the sometimes unnoticed details of the rich imagery of the exhibition. Besides the informative set of figures, drawings, and charts, a glossary can be found at the end of this publication explaining the terminology used. This allows a versatile usability of the content for researchers and readers that are interested in arts, church history or local history.

After the guidebooks about the institution and the exhibitions, source publications, and studies this is the first time, that such a collection has appeared as the 10th publication in a series that was started in 2001.
